What is not insured? (continued)

- ✗ Accidents provoked by ionising radiations other than the medical radiations required by covered medical treatment.
- ✗ Disability and/or death resulting from an illness.

Are there any restrictions on cover?

- ! **Cover is always subject to eligibility criteria**
- ! Left handed persons shall receive scaled benefits related to the upper right limb instead of upper left limb, and vice versa.
- ! In order to qualify for payment of the insured benefit, the disability has to be of a permanent nature, meaning that it has been medically determined that the continuation of the medical treatment will not lead to any significant improvement of the person's state of health, and that the disability will therefore be definitive and irreversible.
- ! In case of several injuries or infirmities resulting from the same accident or from successive accidents, each injury or infirmity will be assessed separately, but the sum of injuries or infirmities affecting a limb may not lead to a degree of disability exceeding the degree of disability corresponding to the full loss of the limb concerned.
- ! In case the insurer paid a benefit for accidental permanent disability, the benefit payable in case of ensuing death caused by the same accident which lead to the disability, will be reduced by the amount already paid by the disability.
- ! Permanent disability of a degree of less than 20% will not qualify for payment of any benefit.
- ! A pre-existing state of infirmity of limbs or organs cannot be taken into account for the assessment of the injuries that are caused by the accident
- ! The degree of permanent disability can never exceed 100%.
- ! If you choose to end coverage of the Expatplus International Medical Insurance plan, you cannot continue cover under the Accidental Death and Disability additional insurance.

Other restrictions apply, please see the General Conditions for the full list of limits and limitations.
